

OUTDOOR MULTI-SPLIT HEAT PUMP (MS5)

The **Outdoor Multi-split Heat Pump** controller board is the outdoor component of multi-split heat pump systems. It allows one single outdoor unit to couple up to three indoor units. It works with a wide variety of indoor unit models available such as **WMG, WMH, 08 Series** and **SB125**.

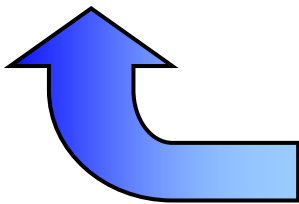

This control module is designed to be robust for ease in installation and low power consumption, suitable for small to medium capacity air-conditioning units.

FEATURES

- Couple to maximum three indoor units.
- 4 Master selection options.
- Cooling and heating operation.
- Outdoor defrost.
- Compressor anti short cycle protection.
- LED display for defrost and sensors missing.
