

PHASE SEQUENTIAL

The **Phase Sequential** is used to protect all the equipments with three-phase power supply against any abnormal power supply (**phase missing, reverse phase or overload**). LEDs will indicate the error and buzzer will sound continuously if any errors detected.

FEATURES

- **Phase missing** protection.
- **Reverse phase** protection.
- **Overload** protection.
- **Buzzer error** indication.
- **LEDs error** indication.
